

BEHRAN SOLUBLE CUTTING OIL

USES

• **Behran Soluble Cutting Oil** is premium soluble oil for making oil in water emulsion which can be used in different cutting metalworking operations such as drilling and cutting ferrous and non-ferrous metals, wherever cooling is essential.

- High emulsion stability
- Good corrosion and rust protection
- This oil contains suitable emulsifiers to produce stable emulsion after 10 double inversion.
- This oil contains suitable additives to prevent growing microorganisms, which results to control odor and emulsion stability.

PROPERTIES

- Ability to make emulsion rapidly

TYPICAL CHARACTERISTICS

Specification	Test Method	Result
Emulsion Appearance	-	Milky White
PH 5% oil in water	ASTM D-1287	9.3
Filter Paper rust test°C	IP - 287	Break points-5%
Density@15.5°C Kg/m ³	ASTM D-4052	894

Packaging

208 liter new steel drum
