

BEHRAN LONG LIFE ENGINE COOLANT / ANTIFREEZE

Long life concentrate engine coolant

USES

- **Behran Long Life Engine Coolant / Antifreeze** ensure freeze protection and corrosion protection in the water cooled engines and cooling circuits in internal combustion engines.
- This product is also perfect for use in all watercooled automotive, truck (both gasoline and diesel) and industrial internal systems of all engines and can be used all year round. This product is an environmental friendly coolant.

PROPERTIES

- **Behran Long Life Engine Coolant / Antifreeze** is a specially formulated coolant and anti corrosion product based on

ethylene glycol and organic additive based (OAT), no amines, nitrites or phosphates.

- **Behran Long Life Engine Coolant/Antifreeze** provides excellent seal compatibility, this coolant has no adverse effects on rubber hoses and gasket materials.
- To ensure adequate corrosion protection, it is recommended to fill half of the capacity of the cooling system with it concentrate and fill the remainder with adequate water, this will provide frost protection up to -37 °C
- Service life: it is recommended that this coolant be replaced every 3 years.

TYPICAL CHARACTERISTICS

Specification	Test Method	Result
Density@15 °C	ASTM D-1298	1116
Freezing point (50%Vol.in water) °C	ASTM D-1177	-37
Reserver alkalinity (ml 0.1N HCl)	ASTM D-1121	4.5
Color	-	Yellow
PH (50%Vol.in water)	ASTM D-1287	7.5
Boiling point (50%Vol.in water) °C	ASTM D-1120	109

PERFORMANCE SPECIFICATION

ASTM D-3306 and complies with ISIRI No. 338

Packaging

12 x quarts (0.946 liter plastic container) in one carton

6 x gallons (3.785 liter plastic container) in one carton

208 liter new steel drum
