

BEHRAN SLACK WAX

Slack wax, a mixture of oil and wax is a by product of the base oil refinery process, which server as a feed stock and that is further refined to produce paraffin wax.

- **Behran Slack Wax** can be used as blending components or water

proofing agent in the manufacture of various industrial products such as candles, canvass coatings and composite wood panels. These waxes can also function as controlled release agents for various chemicals and fertilizers.

TYPICAL CHARACTERISTICS

Slack Wax Grade	Oil Content %wt max.	Congealing Point (°C)	Viscosity @ 100°C (cSt)	Color	Appearance
	ASTM D-721	ASTM D-938	ASTM D-445	ASTM D-1500	Visual
Behran Ultra Light Slack wax	23	49-51	3.9	-	Creamish
Behran light slack wax 1	31	47-59	3.8-4.4	1	Creamish
Behran light slack wax 2	31	52-59	4.5-6.5	-	Yellow
Behran heavy slack wax 1	33	57-65	6.6-10.5	2.5max.	Light brown
Behran heavy slack wax 2	33	57-65	6.6-10.5	3-4.5	Dark brown

Packaging

Bulk

Iso tank

208 liter steel drum
